

FIT3047

The END,

NEXT SEMESTER

Client/product owners

Interview with current FIT3048 students
about FIT 3047

Bertrand

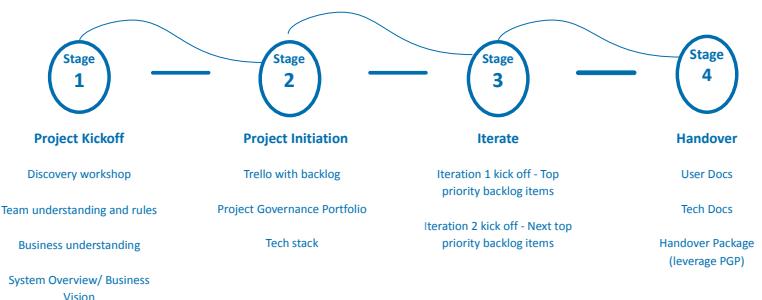

On the menu this week

1. Watch the student videos
2. Approx. 20 mins for both.
3. There will be a seminar participation quiz to go with them, to complete by Sunday.

Roadmap: Where we are

Plan for project

The End

ALL FUNCTIONS must be complete

Must be able to be deployed on CLIENT/PRODUCTION folder on Monash server
(Would be on their ISP, if it were a client ...)

All manuals completed.

All reports finished.
All on PGP

DONE

So let's review 3047/3048

FIT3047

1. Planning - sys overview
2. 2 iterations both should go live, may leave in client/ production server
3. Handover
4. End of unit

FIT3048

same again

5. Planning - sys overview with BUS. client
6. 3 iterations each will go live, if client wants and if client doesn't want, must be able to be deployed.
7. Handover
8. End of unit

all using agile

all on pgp

all using Trello

Then along comes 3048...

Where you will jump right into it,
meet your client week 1, studio 1
and deliver, deliver, deliver.

Now knowing all of this!

So let's just remind ourselves about this unit- 3047

What are we doing.. Why are we here...What's life all about.

You will continue with your team and perhaps the same mentor, but not necessarily.

3047 is a safe environment where you have learned much including

- How to put into context all that you know already
- How to use agile
- New things as you go through this process
- What worked well and what didn't
- How to work with the information you gather
- How to work with your team
- How to work with clients

Our product owners are real people, IT people in industry, business owners, Monash staff BUT all are willing to support you.
The organisations are real.

The Break

During the Break

In-depth consultation with studio mentors

- (Sometime during the break week 14 or whenever)
- 1.5 to 2 hour consultation
- No preparation / No marks
- Agenda includes:
 - Review of Iteration 2 and how you finished
 - Trello Boards - problems
 - What's happening in 3048

There will be 2 workshops just before we begin again. This is information to get you ready.

Suggest you meet your studio mentors then too.

FIT 3048

- Your clients will be available in week 1.
- Your client will be in your very first week - meet and Greet
- You have to come
- You will interview them in week 1, your second studio.

Next semester, there will be 2 studios, as now

Preparing for 3048

- Use your skills.
- If you think you're losing them, then get them back
- DO NOT just leave the program
- Practise, not for us, but for your future!
- Take all you've learnt from 3047
- Be Prepared!

FLUX

Answer the question!

To participate, go to

flux.qa/3CAKSW

Final Reminders

Peer Review - Feedback Fruits

- Will be open at the end of the week, please complete before Wed, week 13
- Required to finalise marks.
- If you are unable to complete it, your grade may be withheld until done.

Plagiarism quiz

- On Moodle, at the top of "My Assessment".
- Required by the university in order to release your grades.

SETU

- We want 100%, otherwise we don't get a good representation

Financial incentives for students

- There is a \$5000 prize draw on offer to students who complete their evaluations this semester (100 * \$50 gift vouchers) - with students who evaluate all their units increasing their chances of winning.

So,

- We will see you all over the coming weeks
- We shall be around if you need us, as will your mentors
 - We are contactable by email
 - We'll do our best to monitor the forums

Thank you for all your hard work this semester

We can see how you've worked hard and learnt a lot

We hope you appreciate what this unit is about and the experience that you are able to get from it

Do your SETU

You will miss us! No more seminars
